RECYCLING JUST GOT SIMPLER

No More Guessing

Recycling Code for Plastics

HELPFUL TIPS

- *To conserve space flatten plastic containers& tins
- *Ensure all containers are empty and rinsed
- *Remove lids from all bottles, throw in garbage
- *Labels do not have to be removed
- NO liquids or food scraps
- *Never leave in Plastic bags
- *No rubber bands & strings from paper bundles
- *No Glass of any kind
- *NO GARBAGE

DID YOU KNOW?

Recycling one aluminum beverage can saves enough energy to run a 14 watt CFL bulb (60 watt incandescent) for 20 hours, a computer for 3 hours, or a TV for 2 hours. Each ton of recycled paper can save 17 trees, 380 gal of oil, three cubic yards of landfill space, 4000 kilow of energy, and 7000 gal of water. A single ton of recycled plastic saves (approx) 23 cubic metres of space in a landfill, 822 gal of oil, and 5773 kilow of energy.

Recycling is 4less purpose, but we are doing our part. As we have started to convert our vehicles to Natural Gas, reducing air pollution caused by burning fossil fuels.
